Advanced Learning Solutions...Relevant! Effective! Flexible!

Success in today's highly competitive and rapidly evolving corporate scenario requires employees to acquire new skills on a nearly continuous basis. The performance of an organization is often determined by the rate at which new technologies are mastered and implemented.

At HiTech, our focus is on empowering our clients with the depth of technical expertise required to meet the challenges of a dynamic and demanding market. We believe in building long-term relations by providing integrated and comprehensive **Learning Solutions** customized to meet the requirements of our clients. "Our training goes beyond certification". Our personalized, high quality training is further enhanced by post training support.

At HiTech we are committed to the creation of a better tomorrow, built by a team of enthusiastic and experienced technical experts, sharing a common vision.

*"The continued success of our clients is our goal, **EVERYDAY.**"*

While there are many training providers to choose from, only a Learning Solution provider like HiTech Institute can offer a comprehensive portfolio of skills assessment tools, flexible training options, internationally recognized content and consulting services. HiTech Institute offers you more than just training! Our "**Learning Solutions**" focus on real-world problems and provides you with access to experienced professionals; **When, Where, and How** you need them.

We will source, customize, and develop the content you need to acquire the skills you want. Our tailored approach means your learning program meets your business objectives with problem-focused solutions.

Through classroom, online, self-paced, or blended learning options, we can meet your specific training needs, no matter what your learning style. Hands-on skills development techniques delivered in class and through virtual labs can be combined with online learning communities led by technical experts and self-paced training, to create deep, continuous learning experiences.

The skills you want - When, Where and How you need them

HiTech Network Inc. is a premier Education and Consulting Company specializing in the design and implementation of solutions that are critical in enabling our clients maintain the competitive edge required to succeed in the demanding global business landscape.

HiTech Institute is the flagship training division of HiTech Network Inc and has continually exceeded the expectations of its clients to become a popular learning center in the Greater Toronto Area. Learning Solutions

Authorized Reseller

The IBM Business Partner emblem is a trademark of International Business Machines Corporation in the United States, other countries, or both. HiTech Network Inc. acknowledges all registered trademarks and brand names world wide.

Creating Value through Partnerships

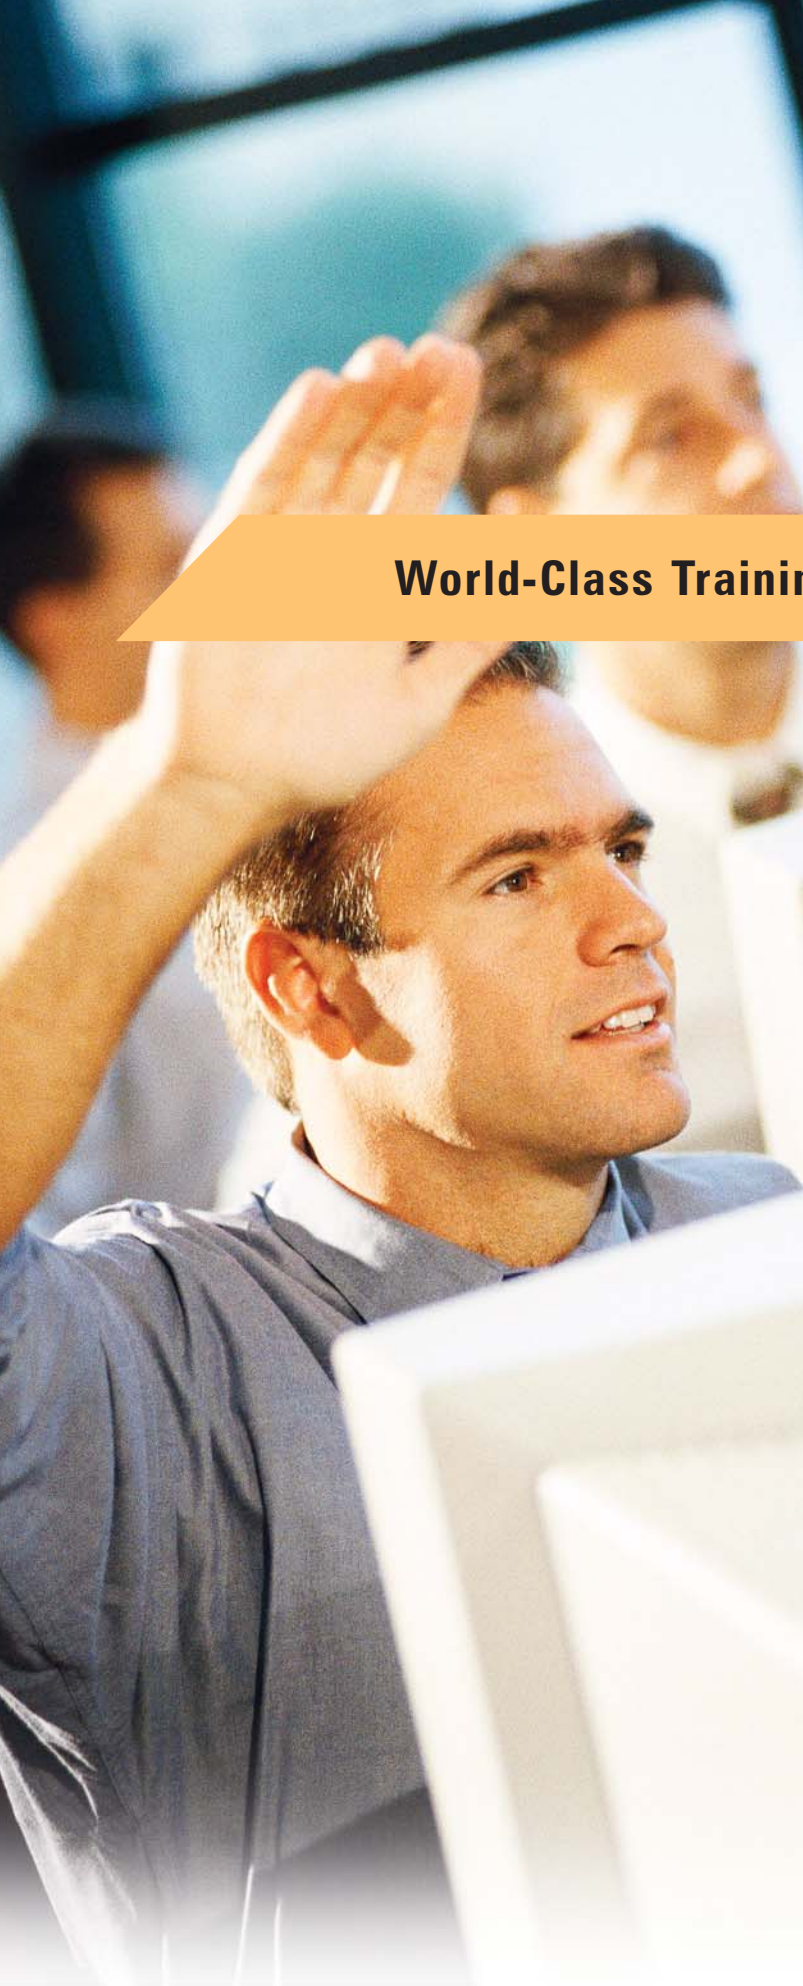

We Make our Strengths work for you

A thorough understanding of today's complex corporate infrastructure has provided us the basis for our flexibility in scheduling and choice of customized delivery formats. We have made a conscious effort to offer a range of courses from entry level ones like A+ to high end training like CCIE and PMP (Project Management Professionals) thereby providing fully integrated and comprehensive training solutions for our clients.

- **Lower cost of ownership and increased productivity results in a better ROI:** Efficient and seamless learning solutions that are provided by HiTech Institute improve productivity and results in improved ROI.
- **Tailored learning solutions:** Organizational and Individual skills assessments provide the Prescriptive Learning Solutions based entirely on your needs.
- **Personalized attention:** Small class sizes ensure personalized attention which is the key prerequisite for the successful amalgamation of knowledge and skills in a corporate training environment.
- **Flexible delivery:** Our flexibility in course scheduling allows you to more easily manage your critical resources.
- **Official Curriculum:** We teach more than knowledge to pass certification exams. We teach technology as it applies to the enterprise with constant exposure to real world scenarios. We maintain the highest standard of quality with the appropriate use of vendor specified curriculum (for example Microsoft Official Curriculum) where applicable. HiTech Institute is also an authorized VUE and Prometric Testing Center.

Through our professional and dedicated trainers we work towards the transformation of individuals and organizations by providing them the access to the vast and rapidly expanding knowledge base. We believe in prescriptive learning which is solidly based on our clients needs. As we provide our clients with industry standard education, we enrich our clients by enabling them to rapidly adapt and successfully meet the needs of a highly competitive market place. We are committed to investing in tomorrow's technologies today, thereby giving our clients the head start that would keep them in step with their aims.

World-Class Training Targeted to your Needs

The success of our students is our goal everyday. We move towards that by bridging the wide gap between the industry's requirements and a student's knowledge. We are aware that practical application is the Gold Standard by which all training is judged and strive at every turn to imbibe the students with the realities of the frontline in knowledge.

The following break-up of our courses vividly demonstrates this vision in training:

- Classroom Instruction-30%
- Laboratory Instruction-40%
- Projects, Case Studies& Presentations-30%

Our method of instruction demonstrates the primary focus on practicality. We facilitate a sound theoretical understanding of concepts, and then quickly expose our students to real life examples of the same in a graded manner with multiple tasks of incremental complexity. We minimize the amount of reading required because we believe that the increased amount of hands-on experience ensures real understanding. On completion, our students are definitely prepared to face any business challenge with confidence.

HiTech Institute maintains excellence in all spheres of activity- whether it is academic performance, instructor expertise or technical facilitation, ensuring you of maximum value on your training investment. We believe that instructors are "learning facilitators" rather than teachers. The students complete each course as accomplished individuals with advanced technical skills as well as the necessary soft skills attained through supervised teamwork. Using a wide range of customized and standard solutions, we deliver and exceed all our client's needs.

Strong Foundations for Success

We have three fully equipped training centers conveniently located in Downtown Toronto, Mississauga and Markham, with a total area of over 6000 sq.ft. The solutions division is located at the very heart of downtown Toronto (Bloor/Yonge). With small class sizes of 6-8 students, and equipped with state of the art equipment, you are ensured of a very personal learning experience. The facilities are fully complimented with High Speed Internet connectivity, full-fledged CCIE level racks with routers, switches, Voice and ATM capabilities.

WHAT CLIENTS HAVE TO SAY ABOUT HITECH

I would certainly recommend anyone who wishes to enter the exciting and dynamic world of modern Internet application development to learn from the HiTech's Java experts, who are some of the most gifted, knowledgeable and enthusiastic computer technology experts and instructors I have ever learned from.

Vladimir Iakhnine,
PhD in Math&Physics

Thank you for a great course! I gained a lot of new knowledge which will help me in my day-to-day work. The facilities, instructor and course content were excellent! A friendly and personable environment contributed greatly my enjoyment of the course Thank you all for an excellent and superior experience.

Alexander Ilin,
City of Toronto

I have taken three courses from HiTech Institute. The quality of instruction has been excellent and ample time is allocated to hands on practice. I would highly recommend HiTech Institute to those who wish to improve their computer skills.

Christine Turner, PhD.

I had a fantastic experience and was able to understand the subject and improve my knowledge of accounting software. The course was excellent in terms of application to my business needs. I am very happy with the training and would definitely recommend the course at HiTech.

Matt Linton

The instructor had a thorough understanding of the CRM architecture, and provided additional information that we needed for our production systems. I am satisfied with the quality of training provided. In fact, we have offered the instructor to come onsite and teach additional CRM implementers in our organization.
